Notes: The ranking is sorted in order of: (1) the grading achieved, (2) whether EP is below or above 100 for Master (M) or Grandmaster (G) grades, and (3) the current average or 300 EP rolling average PRs. The final column shows the best PR reached whilst at the current grade. EP = Experience Points = Sum of match lengths played. High PRs with EP less than 100 have reduced reliability, and this is the reason for ranking order criterion (2).

Where the number of matches played exceeds 300, the number of decisions shown and D/EP shown on the table relate to the most recent 300 experience points.
